Recommendation

I am very pleased to recommend Dr. Wolfgang Hartmann, whose work I have been following since 1979. He has a thorough knowledge of the field I am familiar with: data analysis and statistics. I have read his papers on Cluster analysis and Multidimensional scaling with great interest and pleasure. Particularly remarkable are his careful attention for (tricky) details, and his keen insight into a wide variety of algorithms.

Let me add that I expressed my positive judgment on Dr. Hartmann's scientific capabilities in a favourable review of his book "Geometrische Modelle zur Analyse empirischen Daten", which was published in one of the leading journals in this field, Psychometrika.

I am aware of the fact that Dr. Hartmann has been working under severe constraints the last few years. I hope and I trust that he will be very productive in the near future.

Yours sincerely,

Willem J. Heiser,
Associate Professor
